Available CPD Material (1)

Knowledge level:	General Awareness
RIBA Core Curriculum:	Design, construction and technology
Material type:	Seminar
	 Know the standard values in lighting like lumens, lux, colour temperature, color rendering index and UGR value. Understand the context between luminaires and atmospheres. Have some experiene of different colour temperatures from warm to cool light. Understand the difference between direct light and indirect light. Be able to have an exchange about topic controls and smart homes.
	By the end of this CPD delegates should:
	We offer a good mixture between knowledge and lighting experience by using samples to show, what we explain in theory.
2	With the golden rules of emotional lighting design, in this CPD we offer one way of approaching lighting design in different projects. We start with the standard definition of measurements in lighting and cover the various forms of lighting like direct and indirect light, functional and emotional light, focussed and difuse light.
	Golden Rules of Emotional Lighting Design
