---

## CPD Overview

---

Solid Wall Insulated technology (ICFs) from Nudura provide architects, specifiers, self-builders, developers and contractors a more efficient way to build.

Building with ICF allows homes and commercial dwellings to be built in a stronger, more energy efficient, and environmentally friendly manner.

ICF from Nudura uses polystyrene connected with a web system that allow the forms to be stacked and steel reinforced. The polystyrene forms are then built up on site and filled with ready-mixed concrete. The polystyrene combined with the concrete offer provide a thermal mass, allowing structures to be heated and cooled more effectively. Find out more now.

## Available CPD Material (1)

---

Multiple formats

### An Overview of Insulated Formwork (ICFs) - A Permanent Solution

This seminar aims to cover:

- An introduction to Insulated Concrete Formwork (ICFs)
- Building applications
- Code approvals
- Installation methods

This CPD can be delivered to you live and remotely.

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**  
**Sustainable architecture**

Knowledge level: General Awareness
