CPD Overview

Alumasc Roofing is a leading provider of exceptional products and solutions for new build and refurbishment projects. We have a wealth of experience in dealing with key clients and customers across all building sectors to deliver a quality service from pre-planning through to completion.

Our primary objective is to mitigate client's risk, by providing: The Right System Choice, Efficiently Designed, Correctly Installed, Warranties, Post-Project Handover, and Aftersales Support Service.

As part of our service, a technical manager will be appointed to your project who will be your primary point of contact, reviewing each delivery and coordinating all the internal resources your project needs. You will be regularly updated on progress and supported throughout the entire project by your dedicated contact.

Our portfolio includes a premium range of reinforced polymer modified bituminous waterproofing membranes, single-ply membranes, hot-melt structural waterproofing, cold applied liquid coatings, green roof solutions, stormwater management and a full range of complementary accessories such as building services supports and guardrail edge protection systems.

Available CPD Material (3)

	Structural Waterproofing
	This seminar looks at areas of structural waterproofing, the hot melt rubber system, installation and typical applications.
