CPD Overview

Available CPD Material (7)

Entrance Flooring Systems: Specifying to relevant legislation and guidelines

To provide an understanding of how to specify an entrance system in order to comply with current legislation, including Health and Safety guidelines and the Equality Act 2010

Material type: Online Learning, Seminar
RIBA Core Curriculum: **Design, construction and technology**
Legal, regulatory and statutory compliance
Knowledge level: General Awareness

Sustainable Linoleum Flooring and its Contribution to the Built Environment.

This CPD is a guide to specifying linoleum and its aim is to provide an understanding of the environmental and performance benefits of linoleum, as well as look at the design opportunities of the material within the built environment.

By the end of the CPD you should have a greater understanding of:

- what linoleum is, how it is made and the benefits it offers to the environment and people's health and well being.
- how linoleum is assessed under a variety of recognised building schemes and how it contributes to the built environment under each one
- the performance benefits of linoleum and its relevance to a variety of application areas
- the design flexibility of linoleum in its varying formats
- how linoleum is installed and maintained over its lifetime

Seminar

RIBA Core Curriculum:

Design, construction and technology
Sustainable architecture

Knowledge level:

General Awareness

Electrostatically Flocked Floor Coverings: Genuine innovation with unique design and performance characteristics

The aim of this presentation is to introduce you to flocked floor coverings, we will discuss what the product is, how it's made and all of the design possibilities before looking further at specification considerations and segment suitability to allow you to confidently specify flocked flooring where appropriate.

Material type:

Seminar

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:

General Awareness

The Role of Flooring in Dementia-Inclusive Design

This CPD provides accurate and evidence-based information on how to correctly design dementia inclusive environments. It explores the effects and challenges of dementia when designing facilities and outlines the best practice guidance – with a particular focus on flooring. Aimed at professionals specifying floor coverings for commercial and public buildings, or anyone who has an interest in inclusive design, 'The role of flooring in dementia-inclusive design' provides you with the help to get started. By the end of the CPD you should have a greater understanding of:

- What dementia is, its common symptoms and the types of dementia
- The prevalence of dementia in the UK
- The role that flooring plays in dementia-friendly design
- Best practice guidance for designing a dementia-friendly flooring scheme
- The help and guidance that is available to support you in selecting the right flooring products
- How to start designing a dementia-friendly scheme

This CPD can be delivered live by one of Forbo's trained advisors with the opportunity to ask questions at the end of the presentation

Entrance Flooring Systems

To provide an understanding of how to specify an entrance system in order to comply with current legislation, including Health and Safety guidelines and the Equality Act 2010

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**
Legal, regulatory and statutory compliance

Knowledge level: General Awareness

The Environmental Credentials, Performance and Life Cycle Costs of Linoleum

This seminar looks at what linoleum - a natural product - really is, what it is comprised of, its environmental credentials, its performance criteria, some design possibilities and gives an insight into the life cycle costs of this traditional and versatile product.

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**
Sustainable architecture

Knowledge level: General Awareness

Entrance Matting Systems: Complete Solutions to Maximise Performance and Minimise Risk

The aim of this seminar is to give the architect an understanding of the reasons for using an entrance flooring system and the benefits to the end-user, an appreciation of the factors affecting selection, and the need to consider selection for the beginning of the design process.

Material type:	Seminar
RIBA Core Curriculum:	Design, construction and technology Legal, regulatory and statutory compliance
Knowledge level:	General Awareness

Classifications

Subject/Product Areas (CI/SfB)

Finishes

Floor finishes: carpets > Carpets, tiles

Floor finishes: flexible sheets, including rubber, plastics > Special sheet flooring

Floor finishes: flexible sheets, including rubber, plastics > Sheet and tile flooring

Floor finishes: flexible sheets, including rubber, plastics > Sports sheet flooring

Floor finishes: carpets > Mats and matting

Fittings

Circulation fittings, signs, etc. > Entrance mats, accessories

Special activities, requirements

Green applications, resources; sustainability > Natural floor coverings
